

# SHS-1321 Biometric Digital Lock

## Technology and Security

Electronic standalone lock ideal for installations in homes and offices. Has motorized lock and latest technologies

### • Resources

Product with the latest technologies and great build quality, where the access may be done through password or RFID (Mifare). It also includes fire sensor, "Don't Disturb" function, antispy function, weak battery indicator and other safety mechanisms.

### • More security

#### Double authentication mode

With the double authentication mode, both the password and the biometric system must be authenticated to open the door, which reinforces security.

#### Don't worry about the finger stains

The random numbers avoid intruders identifying the password due to the panel wear.

#### Configuring the antitheft button / One touch

Pressing the "home" button makes the lock understand that there is no one else in the surroundings, emitting a sound alarm in case someone tries to leave.

### • Technical Specifications

Opening	Password, RF card or Tag
User number	20 cards and one password
Password	4 to 12 characters
Door thickness	40 to 50 mm
Material	Zn, Al, plastic ABS
Humidity	20 to 80%
Power supply	Works with 4 AA 1.5V batteries
Battery life	Approximately 10 months (with 10 openings / day)
Case dimensions	208 x 206 x 85 mm
Color	Black
External measures	69 x 175 x 22 mm
Internal measures	181 x 92 x 48 mm
