

SHS-5230 Biometric Digital Lock

Technology and Security

Electronic standalone lock ideal for residential and office installations. Has motorized lock and latest generation technology.

Security: Prevention against electrostatic discharge - Fire detector sensor.

Purchase Code: 000.000

• Features

Product with latest generation technology and prime build, where the access can be done through key, biometry or password. Also has fire sensor, "Don't Disturb" function, antispy function, battery indicator and other safety mechanisms.

• Better security

Double authentication mode

With the double authentication mode, both the password and the biometric system must be authenticated to open the door, which reinforces security.

Don't worry about the finger stains

The random numbers avoid intruders identifying the password due to the panel wear.

Configuring the antitheft button / One touch

Pressing the "home" button makes the lock understand that there is no one else in the surroundings, emitting a sound alarm in case someone tries to leave.

• Technical Specifications

Fingerprint capacity	Up to 100 fingerprints
Method	Optical reader
FRR	0,01%
FAR	0,001% or less
Reading speed	Less than 1 second
Password capacity	1 master password 10 user passwords
Combinations	From 4 to 12 digits
Door thickness	From 38 to 52 mm
External measures	81.3 x 318 x 75 mm
Internal measures	79 x 290 x 80.3 mm
Material	Zn, AL, Plastic ABS
Operating temperature	-20°C to +60°C
Humidity	90%
Power supply	Works with 8 AA batteries
Lifetime	Approximately 12 months (with 10 openings / day)
Case's dimensions	297 x 369 x 102.3 mm
