# NFC module TWN4

Modules Multitag TWN4 NFC, NFC-NFC-P and PI are flexible readers that allow the user to read or write tags in various frequencies, including ISO LF and HF frequencies and patterns.

## • Features

The TWN4 allows users to read and write to almost any tag or tag frequencies (multiplatform) 125 kHz / 134.2 kHz and 13.56 MHz / NFC. It supports all major transponders from various distributors as ACUPROX, HID, MIFARE, Atmel, EM, ST, NXP, TI, LEGIC, etc. INSIDE. ISO standards as well as ISO14443A / B including layer 4 (T = CL), ISO15693, ISO18092 / ECMA-340 (NFC).

The new generation of RFID TWN4 module combines all the qualities of TWN3 modules in a single product, even with the same mechanical dimensions (encapsulation desktop and OEM PCB) that allows direct compatibility. Provides communications through the USB TTL, RS-232 and interfaces.

## • Special Functions

- Available SDK for developing applications that run directly on the reader;
- Energy saving mode;
- Two sockets SAM (Secure Access Module) board;
- Additional interfaces for OEM PCB version;
